

For Immediate Release

Fast Video Cataloger 3.5 adds new video discovery feature

Contact: Videostorm Support, [support@videocataloger.com](mailto:support@videocataloger.com)

Videostorm Sweden AB has released Fast Video Cataloger 3.5 to introduce a discovery mode for offline video clips. Fast Video Cataloger is a video clip management software for Windows that presents synopses of large quantities of video files. Visual search in combination with metadata and keywords let users find scenes inside videos in a natural way without playing them.

Fast Video Cataloger 3 is a video clip management software for Windows designed to handle thousands of video files on a standard PC. The program extracts a wall of thumbnail images to represent all scenes in each video. This provides a visual search through inside video files instead of watching the duration of clips. Each thumbnail doubles as a playable bookmark for that scene and is manually enriched with keywords for filtering and searching. Fast Video Cataloger 3.5 introduces three new windows with functions to assist with video discovery.

Fast Video Cataloger 3.5 is a personal video clip management software for Windows with a changeable user layout to fit into existing video workflows. Each video is represented by a wall of thumbnail images that combined provides an overview of the whole collection. New thumbnails and keywords can be added manually by the user during playback. Search by keywords to find all individual scenes in the entire catalog matching that keyword. Drag and drop files from Fast Video Catalog 3.5 to external video tools for direct access. Fast Video Cataloger version 3.5 adds a build-in tool to automatically remove duplicate video files.

Fast Video Cataloger 3.5 is a Windows tool for communicators, educators, instructors, researchers, security professionals, digital media labs, police intelligence specialists, and everybody who manages video clip collections.

Fast Video Cataloger runs under Windows 8.x/7/Vista/ with .NET framework. A single-user license costs \$197(US). Multi-user discounts are available. You can download a trial version of Fast Video Cataloger from <http://videocataloger.com/>.
