Fast video cataloger is an easy to setup video database software for small to mid-size businesses that let you quickly find information from a large number of video files

Fast Video Cataloger – Fact sheet

FAST VIDEO CATALOGER IS AN EASY TO SETUP VIDEO DATABASE SOFTWARE FOR SMALL TO MID-SIZE BUSINESSES THAT LET YOU QUICKLY FIND INFORMATION FROM A LARGE NUMBER OF VIDEO FILES

Web page: <http://videocataloger.com/>

Free trial: <http://videocataloger.com/download/>

Price: \$197 for single computer / single user license including free upgrades during the first year.

System requirements: Windows 7 or later, i5 CPU or better, internet required during activation of the program but not after that.

Space requirement: Video files can be stored locally, on a server or a NAS. Video catalog is recommended to be stored locally on an SSD for best performance. 10 GB SSD would be enough for a video catalog with 10000 videos. (using default index settings)

Video formats: Mpg, mpeg2, mpeg4, avi, qt, rt, wmv, flv and almost all video clip formats through directshow.

Security: Video collections as well as individual videos can be encrypted and password protected to guard sensitive data.

How it works: Fast video cataloger is installed locally on a computer and does not require any additional server installation. The database is stored locally allowing every user to build his personalized video catalog that works regardless of network connection. Video can be stored locally or on a remote server across several storages. Even without access to the video files it is possible to search and work with the video meta data.

How to build a catalog: Add videos folders or files and common meta data to the program and it index all the videos, scanning them for thumbnails and place them inside your video database. Add more meta data to your catalog like keywords to specific scenes, people in the videos, associated images and more. Quickly search your catalog by keywords and play any video straight from the thumbnails position.

Benefits: Save time by finding information in videos quicker than ever before in a powerful but easy to use package. Get a competitive advantage by leveraging video knowledge from video lectures, internal recording, competitive research and all other sources of video intelligence.
