

FVC FAST VIDEO CATALOGER

Professional Video Organization Software

Fact Sheet 2026 • Version 9 • 15+ years of continuous development

Website: videocataloger.com | Free 30-Day Trial: videocataloger.com/download

OVERVIEW

Fast Video Cataloger is the fastest local video content management system for Windows PC — built for professional video creators. The core engine is written in C++ and optimized for 64-bit, multi-core CPUs and GPU acceleration.

VISUAL THUMBNAIL TIMELINE

Automatically generates a wall of scene thumbnails for every video. Click any thumbnail to play from that exact moment. Browse, search, and preview your entire library visually — even when video files are on disconnected drives.

PRICING

Perpetual License: \$197 single computer

Maintenance: \$47/year (1st year included)

Subscription: \$9.90/month

Lifetime license for the current version. Licenses are transferable to a new computer. Fully functional 30-day free trial available.

SYSTEM REQUIREMENTS

OS: Windows 10 or later (64-bit)

CPU: Intel i5 or better

Storage: ~10 GB SSD per 10,000 videos

Network: Internet for activation only

VIDEO FORMATS

MPG, MPEG2, MPEG4, AVI, QT, WMV, FLV, MOV, WebM, and virtually all formats via DirectShow codecs.

KEY FEATURES

- ✓ Tested with 20,000+ videos and millions of images
- ✓ Scene-level keyword search and metadata
- ✓ Video transcript support
- ✓ Scene playlists with EDL/XML export for editors
- ✓ Printable contact sheet image export
- ✓ Cast / actor management per video
- ✓ Smart bins and auto-tagging from folders/filenames
- ✓ XMP metadata extraction
- ✓ C# scripting API and plugin system
- ✓ Customizable multi-screen UI layouts
- ✓ Works offline with disconnected media

SECURITY & PRIVACY

100% local — no cloud, no uploads, no transfer fees, no privacy leaks. Password protection at the collection level. Optional encryption for sensitive video files. No adware or spyware.

COLLABORATION

Share catalogs over a local network or the internet via a web server. A built-in server version lets teams connect to the same video database. Switch seamlessly between local and shared mode.

HOW IT WORKS

Install locally with no server setup. Add video folders, scan for thumbnails and metadata, then enrich with keywords, scene tags, actors, and companion images. Your entire catalog is stored in a single portable .vcat file — easy to share, back up, or move.
